

Northwest District Neighborhood FRS Net Script

- This is Northwest District _____ (*Neighborhood*), my name is _____
(*First, Last Name*) and I'm net control this evening.

- Before we begin, do we have any stations with emergency or priority traffic?

" Long Pause to verify no emergency traffic"

- If you have an emergency during the net, indicate so with the words "emergency traffic" on your first key-up.

- This net meets on FRS channel ____ (*channel number*) with no tone. This is an Open Net designed for all community members. The purpose of this FRS Disaster Preparedness net is to train radio operators in emergency procedures and test radio communications equipment. FRS radios are not designed for long distance communications and work well for neighborhood communications.

- This is a directed net. Please do not transmit unless directed to do so by net control. Use your name to break the Net and wait to be recognized before asking a question or making a comment.

Tonight's order of business will be:

- News and Announcements
- Check-ins
- Questions or Comments

- News and Announcements

(Give local news or announcements – Don't forget to announce monthly CERT training meeting first Wednesday of each month.)

Does anyone have any news or announcements they'd like to make?

- Check-in Order

The check-in list is presented alphabetically by first name.

When you press the push to talk button (PTT), to transmit, make sure the PTT button is completely depressed before speaking or your message will be cut short.

If your check-in is NOT acknowledged please speak up during missed or visitor check-ins.

- Now for the roll

When checking in use your First and Last Name, Neighborhood & Cross Street Location

For example: Cindy Smith, Santa Clara, corner of Irving Rd. & Dover Dr.

- Any late or missed check-ins? Please come now:

- Any guest or visitor check-ins? Please come now:

- Are there any Questions or Comments before we close this Net?

- This is _____ _____ (*First, Last Name*) closing the FRS Net for Northeast District _____ (*Neighborhood*) and returning this frequency back to normal operation. Thank you to all the stations that have participated tonight.

Notes:

Practice good radio protocol only.

- No codes such as 10-4
- No use of Breaker-Breaker as Break-Break means emergency traffic for amateur radio
- Stress proper identification – Persons First/Last name, Division and Location
- Encourage all family members to participate
- Get to know the ham radio operators in your division for longer distance emergency communications

Think of FRS as Neighborhood Emergency Communications System – nothing more!
